 The University of Tokyo						
1	University of Tokyo Research Internship Program (UTRIP)	UTRIP, the "University of Tokyo Research Internship Program," is an intensive summer research program targeting undergraduate students. Its underlying principles are centered on creating a challenging and rewarding experience for undergraduate students who are seriously thinking of pursuing advanced study at a higher education institute. During the program, the participants receive intensive guidance and hands-on experience on conducting research from the Faculty of Science's renowned faculty members. Students develop a better understanding of what is required to become a scientific researcher. The program is meant to be a good trial for students to test their aptitude for rigorous study in the natural sciences. Students who are given high evaluations by the faculty members will be given priority for the Faculty's scholarship. In addition to their research work, students will also have a chance to visit historical sites in Japan and take advantage of Japanese language courses.	http://www.s.u-tokyo.ac.jp/en/utrip	English	June	6 weeks
2	The University of Tokyo Summer Internship Program in Kashiwa (UTSIP Kashiwa)	The Graduate School of Frontier Sciences runs the English language short-term summer program UTSIP Kashiwa (The University of Tokyo Summer Internship Program in Kashiwa) targeting 3rd and 4th year undergraduate students from overseas institutions to strengthen their consideration towards attending graduate schools in Japan. The course provides selected students with an introduction to the natural sciences and social sciences through interdisciplinary lectures. After developing a research proposal, they will go on to gain first-hand experience of academic research processes under supervision in a laboratory of their selection and be exposed to cutting-edge research in the natural and social sciences. Students will also be given introductory Japanese language course and exposure to Japanese culture during their stay.		English	June	6 weeks
3	International Core Research Center for NanoBio (C2CNB) Summer Internship Program	The Graduate Schools of Medicine, Engineering, and Pharmaceutical Sciences at the University of Tokyo jointly operate this summer internship program. The purpose of this program is to provide participants with biomedical research experience in the basic and translational sciences. Research projects will be posted on a separate webpage of C2CNB as shown below. The selected students will actively participate in ongoing research activities. At the end of their summer experience, students will submit their research data in a journal article. An "End of the Program Presentation" is also planned to provide an opportunity for participating students to present their results to a group of faculty members and graduate students. During the two-month period of the program, participating students will be given the opportunity to acquire research skills and, through participation in institutional seminars and lectures, receive guidance invaluable to assessing their career goals in relation to basic and translational research. The program is open to any graduate students who have at least one year of laboratory experience	http://park.its.u-tokyo.ac.jp/c2cnanobio/english/index.html	English	July	2 months
4	UTokyo Innovation Summer Program (TISP)	The University of Tokyo launched this summer program in August 2013. During the two-week TISP program, students, both from outside Japan and the University of Tokyo, will intensively experience classes, workshops and field research while honing their innovation skills, in Tokyo and the Tohoku region, specifically disaster-struck areas in the north-east of Japan. The entire program is built upon themes, which will lead to a wide variety of unique sub-themes. TISP has four unique features: 1) A rigorous teaching method. The program offers classes/workshops built on two methodologies: the "i.school" method to foster people's innovative thinking, and the case-method teaching. 2) Japan-unique contents. Students learn from uniquely Japanese contents. In 2014, the two main themes are Japanese cultures and the Tohoku issues. 3) A mixed student body, and 4) Field experiences	http://ischool.t.u-tokyo.ac.jp/summer/	English	August	2 weeks

 Waseda University						
1	Summer Session	Courses from Politics, History and Culture in the context of Japan and Asia. Optional Japanese course is available.	http://waseda-summer.com	English	June 29 to July 23	4 weeks
